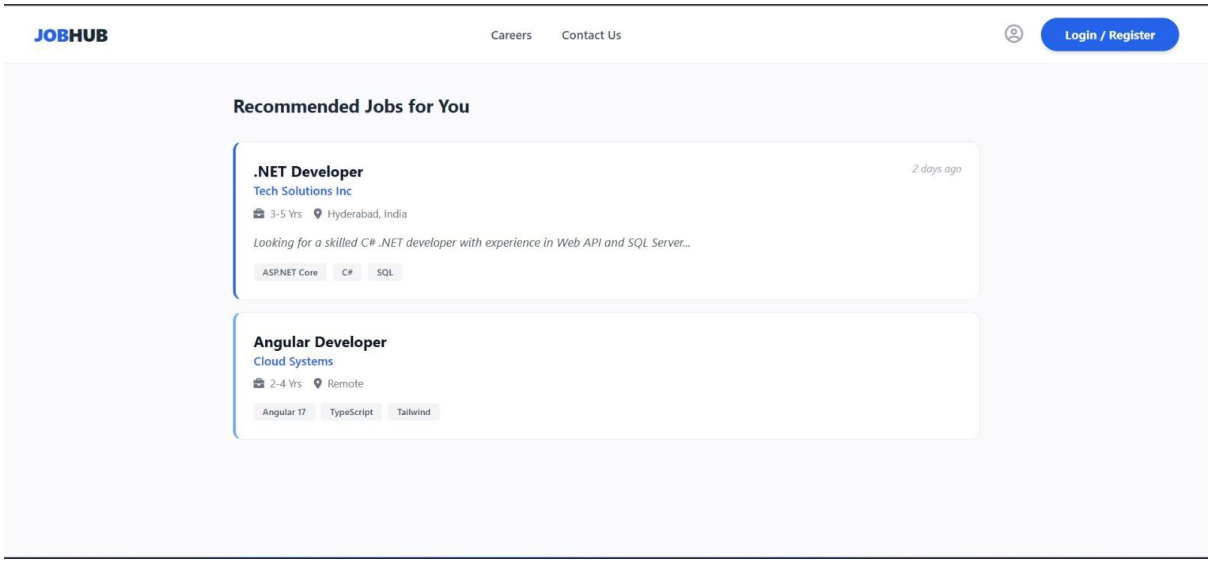
Part 1: The Guest Experience (Pre-Login)

Focus: Attracting talent through a clean discovery interface.

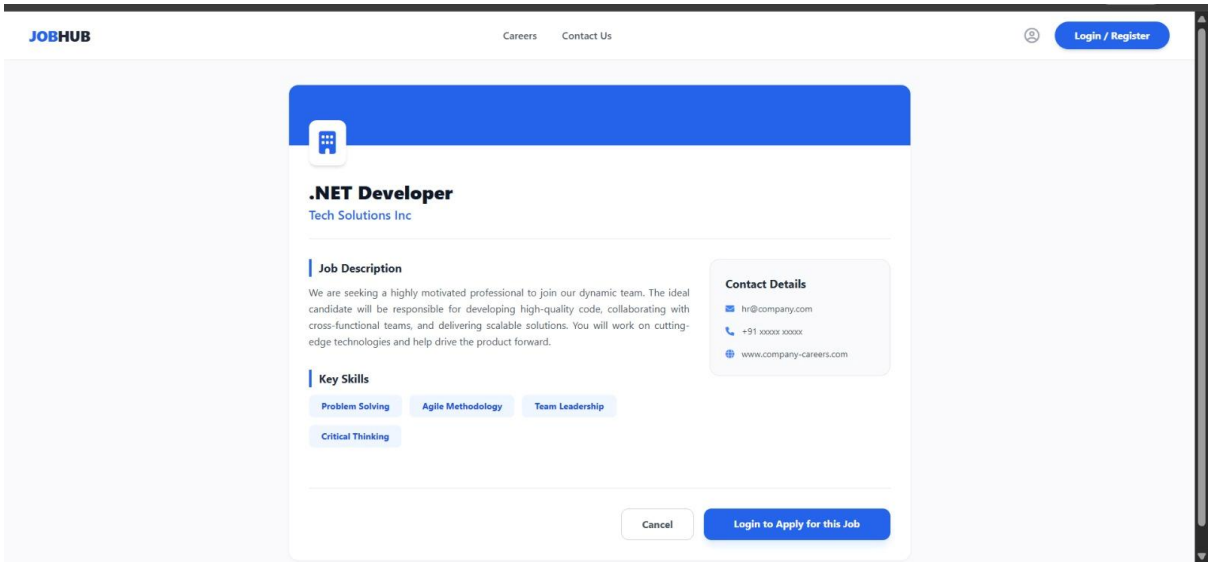
1.1 Job Discovery Landing Page

The landing page focuses on "Recommended Jobs" to immediately engage the user. High-level metadata like experience requirements, location, and tech stack tags (ASP.NET, C#, SQL) are visible at a glance.



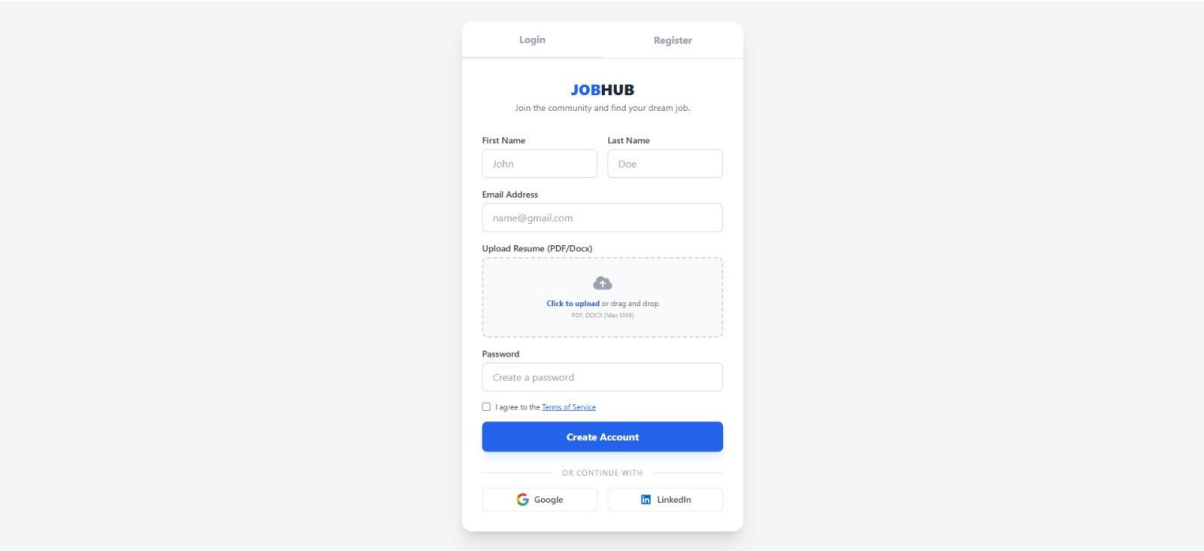
1.2 Job Detail & Registration Funnel

When a guest clicks a job, they see the full description and contact details. To maintain data integrity and security, the "Apply" button acts as a funnel, prompting the user to Login or Register before proceeding.



1.3 Simplified Onboarding

The registration process is designed for speed. Users can upload their resume immediately, which the system can parse to build their profile automatically.

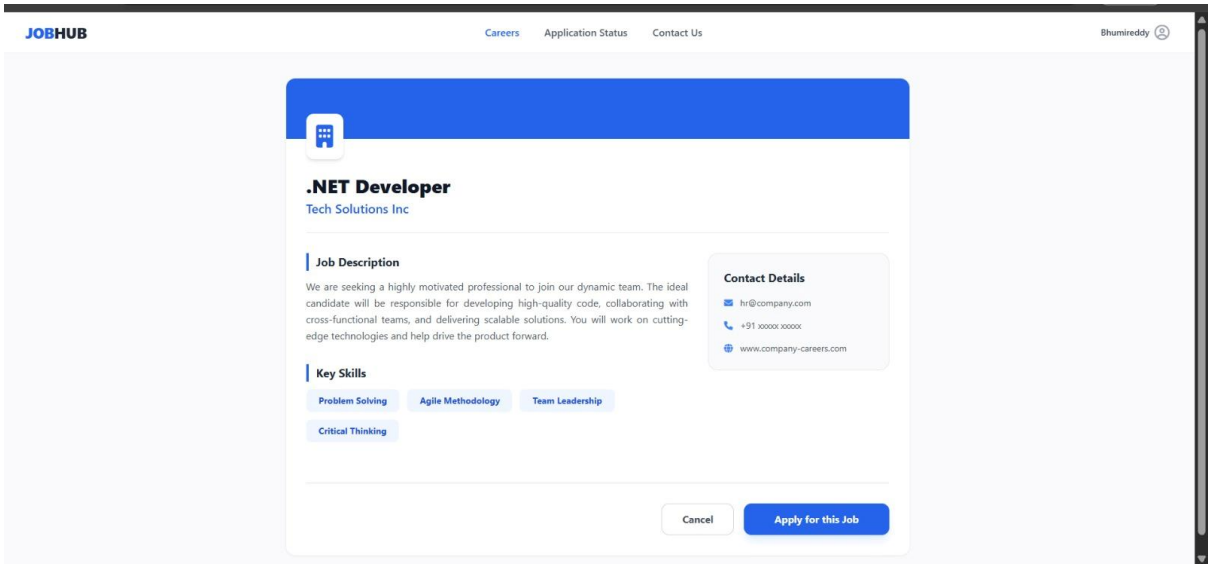


Part 2: The Authenticated Experience (Post-Login)

Focus: Seamless application management and customization.

2.1 Personalized Dashboard

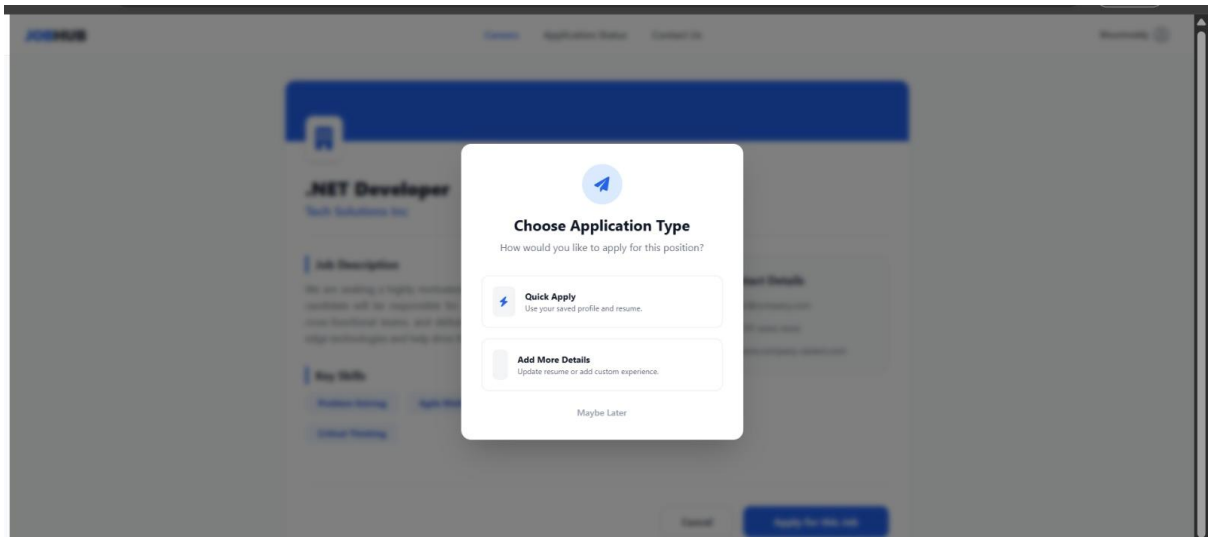
Once logged in, the user ("Bhumireddy") sees a personalized header. The "Apply for this Job" button is now fully unlocked and active.



2.2 The "Quick Apply" Workflow

To reduce "application fatigue," EPROS CAREERHUB offers a choice:

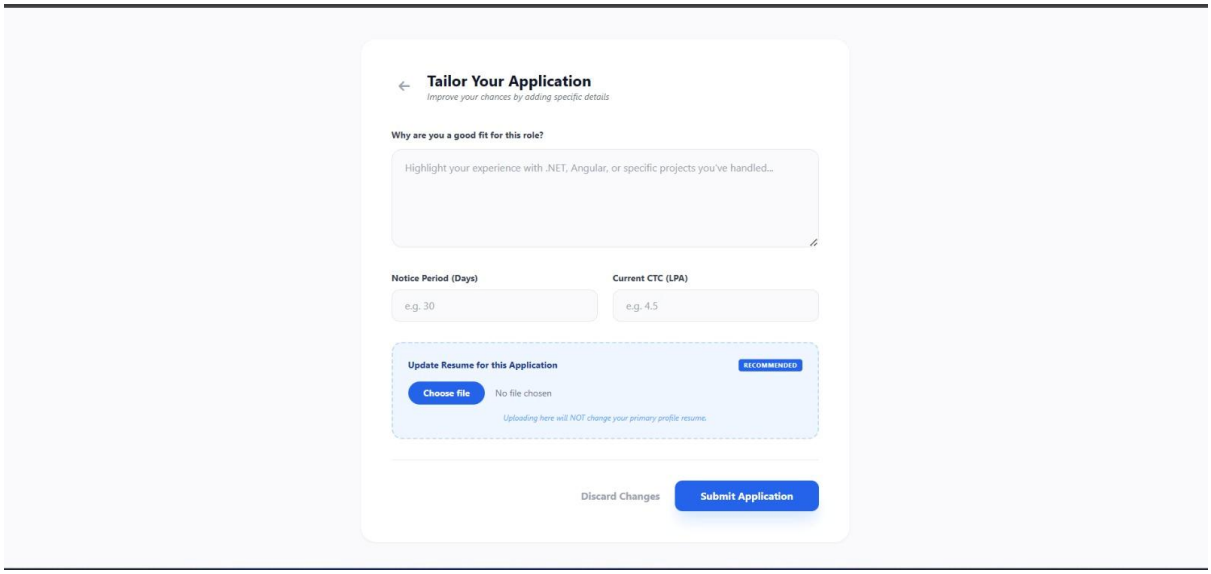
- **Quick Apply:** Uses the profile and resume already on file for a 1-click experience.
- **Add More Details:** Allows the user to customize their pitch for specific roles.



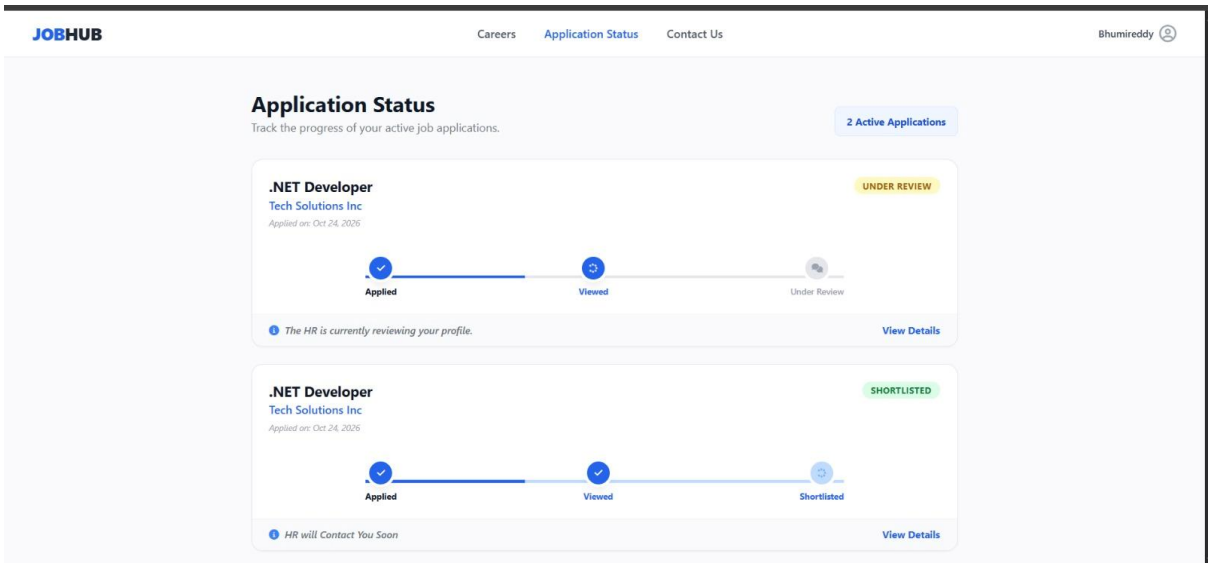
2.3 Tailoring the Application

For high-priority roles, users can provide specific details:

- **Fit Analysis:** A text area to highlight specific experience with .NET or Angular.
- **Logistics:** Input fields for Notice Period and Current CTC.
- **Contextual Resume:** Ability to upload a tailored resume just for this specific application.



2.4 Post-Submission: Application Status Tracker

After submitting the application, the system redirects the user to the **Application Status** page. This provides real-time transparency into the hiring process:


- **Visual Progress Bar:** Shows milestones like "Applied," "Viewed," and "Under Review".
- **Dynamic Status Tags:** Instant feedback such as "UNDER REVIEW" or "SHORTLISTED".
- **Direct Communication:** Updates like "HR will Contact You Soon" are displayed directly on the card.
